

Multi-Point Locking Design

Red inner slide bar interlocks with specially designed locking lug hinge at each drawer opening when in the locked position. This multiple point locking principle eliminates torque on the bar usually found in devices that lock at the top and bottom positions only.

Spring-Open Action

A slight upward motion of the red inner slide bar releases all lock points, permitting the built-in spring-loaded hinge to swing the bar clear of drawer openings. Engineered to give sufficient clearance for unrestricted access to adjacent files when locked or unlocked.

No Storage – Accident – Damage Problem

Since the locking bar becomes an integral part of the file and swings clear of drawer openings, it solves the problem of storing heavy, dangerous bars in the office.

Simple Installation

The locking bar can be installed without opening the file or disturbing its contents – in a matter of minutes. It can be installed with blind rivets or with sheet metal screws provided. To install:

1. Remove wood shipping block at top of bar and discard.
2. Slide bar can be reversed to permit installation on either right or left side of file. Normally supplied for right side installation. To reverse, simply bend small red tab inward at bottom, slide inner bar out and reinstall from other end. Bend small tab out again.
3. Drill upper screw hole (3/32" drill bit) 2-3/8" down and 1/4" over from upper drawer opening. (Large red hook is at top).
4. Insert and set screw to hold bar in place.
5. Use hinge as locators for other holes.
6. Drive screws home while keeping hinges firmly in place against file.

Specifications

Constructed of heavy 16 gauge formed steel. The inner steel bar is finished in red to easily indicate locked or unlocked position. Both inner and outer bar are finished in power coat acrylic enamel. All hinges are locking lugs of 16 gauge steel. #6 x 3/8" truss Phillips head self-tapping screws supplied.

Ordering

Catalog Number	Length in Inches	Number of Drawers
FCL-2	21-1/2"	2
FCL-3	33-1/2"	3
FCL-4	45"	4
FCL-5	56"	5
