Part # SF 226S

*SeismaFlex™ brackets are the ideal fasteners for top-mounting heavy items (entertainment centers, hutches, armoires, etc.) directly to a wall stud. The brackets flex to absorb energy therefore reducing stress at fastening points. Extended length brackets are ideal for TV cabinets or other items that are up to 4" away from the wall.*

### Kit Includes:

- |   |                          |
|---|--------------------------|
| (2) 2" x 6" HD SeismaFlex™ stainless steel brackets |                          |
| (2) 1/4" x 2" wood screws                           | (2) 1/4" x 2" Tek screws |
| (8) 8 x 3/4" wood screws                            | (8) 8 x 1/2" Tek screws  |
| (2) Cover-up caps                                   | (2) washers              |

### Installation Instructions:

1. Use a stud locating device to find and mark proper fastening locations on the wall.
2. With furniture in place, position bracket flush with the top, and line up markings with center hole on bracket. Secure bracket to furniture using screws provided.
3. Attach bracket to wall stud using 2" screws. Press cover-up cap in place.

**Hidden Method:** Simply install bracket upside down by attaching it to the wall before mounting to furniture.
